

Control Wire

Pressure Switch
(on tank)

Dash Mounted Switch
(optional)

Note: Remove control module cover to make control wire connections. Use 1/4" female 90 degree flag style quick connect terminals to make these connections. If necessary, the control tabs can be bent slightly to avoid wire interference. Replace cover before operating compressor.

For **POSITIVE** control, connect this end of the control wire to + C,

For **NEGATIVE** control connect it to -C

For **POSITIVE** control, connect this end of the control wire to a positive battery source (12 or 24 volts), such as V+ on the control module, or a dash mounted switch.

For **NEGATIVE** control, connect it to any convenient ground location on the vehicle, or to GND on the control module.

Power Cable

Switch

+C — — +V
-C — — GND
